

Technical Details

- Dimensions: 266.7 x 98.5 x 4mm

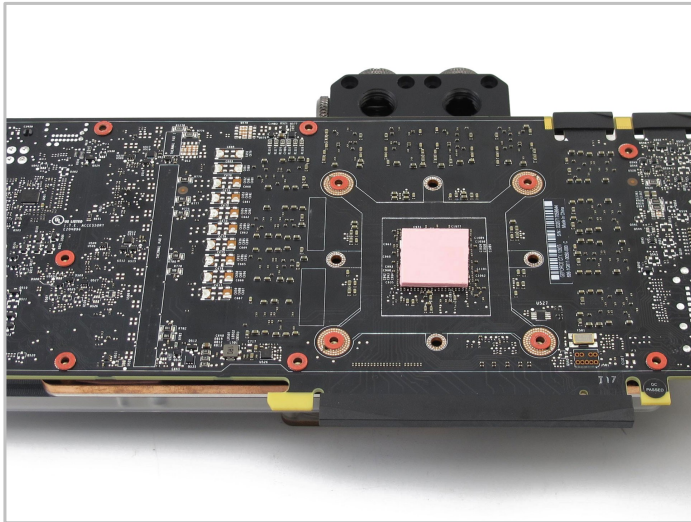

Box Contents

- 2 x 1mm thermal pad
- 1 x 2mm thermal pad
- 11 x M2.5 x 10mm screw
- 11 x Red washer

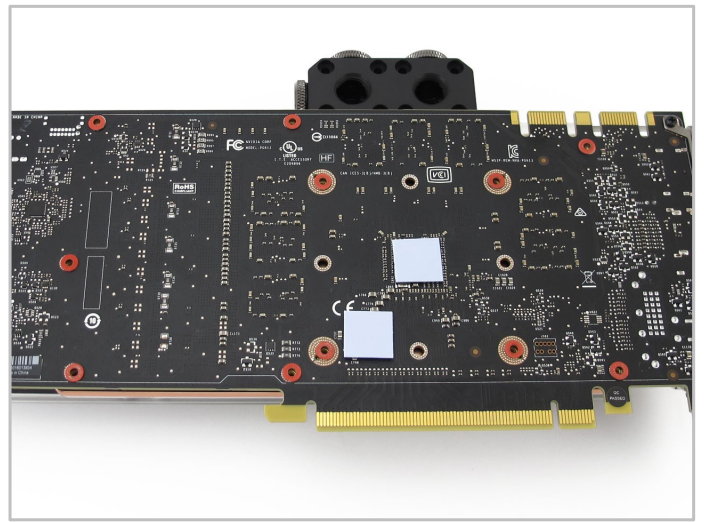

Note: This backplate is only suitable for reference design GTX 1080, GTX 1080 Ti and Titan X Pascal cards. If you are unsure if your card is a reference design card, contact us prior to installation to make sure.

1. Follow the Razor GTX 1080/1080 Ti manual up to step 11. Replace steps 12 and 13 with the steps below.

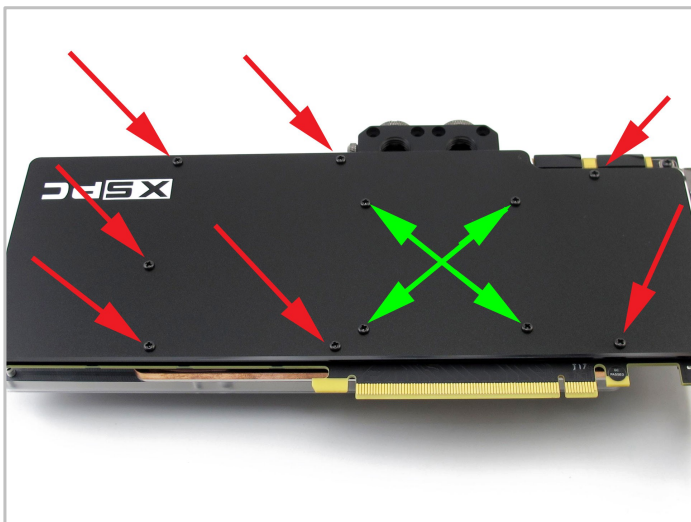

2. GTX 1080 Ti / Titan X Pascal

Remove the film from both sides of the thicker, pink thermal pad and place it on the location shown above. Place the red washers over the screw holes shown above.

2. GTX 1080

Remove the film from both sides of the thinner, blue thermal pads and place them on the locations shown above. Place the red washers over the screw holes shown above.

4. Place the backplate onto the card, making sure the front thermal pads and washers stay in place. Now attach the backplate, starting with the four screws marked in green. Do not over tighten the screws as this may bend the card and cause permanent damage.

5. The card is now ready for use. When you first boot it is advisable to use monitoring software to check the core temperature. If the temperature is high you will need to remount the block.
